

Team Formation

Activity

GOAL

Form cross-functional teams of about seven multi-skilled people that could independently perform (or learn how to) all the tasks required to deliver completely “done” end-to-end functionality: analysis, design, development, testing, etc.

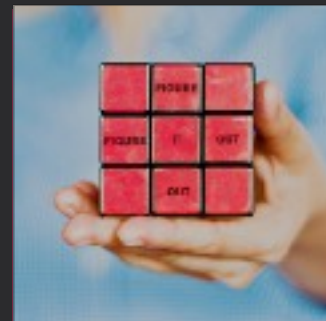

CONSTRAINTS

- Team size (3-9)
- Number of teams = Number of PODs
- Coding experience in:
 - Java, DotNet, or Python
- Automation experience (DevOps)
- Command line experience
- Architecture & design experience
- Organization and planning experience
- Analysis & Refinement experience

DELIVERABLES

1. A named team of 3 - 9 people
2. Agree on a coding language:
java, c#, python
3. Starts of a working agreement
4. Agree on development environment:
 - Whose laptops will you use?
 - Are you pairing or mobbing?

INSTRUCTIONS

1. You have **20 minutes** to form into teams.
2. Choose a team name
3. Start a working agreement:
 - a. What coding language will you use?
 - b. Whose laptop are you using?
 - c. How will pair & mobbing work?
