

# Specification by Example

## Activity

### GOAL

Produce a specification for the system operations listed in the deliverables below.

### CONSTRAINTS

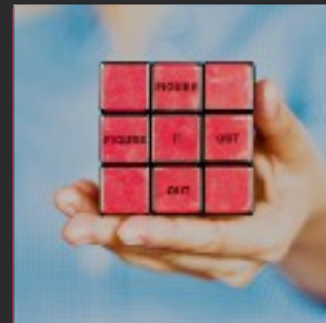

- 20 minutes
- Format must be Tabular or Given/When/Then Syntax

### DELIVERABLES

A specification for the following system operations:

- startGame()
- move()
  - using getStatus()

### INSTRUCTIONS

As a team, create examples for each system operations listed.

After 3-5 examples, test your team for understanding.

# Remember...

- We model to have a conversation.
- We model to learn.
- All models are wrong, and that's ok.
- Never model alone.
