

Craig Larman's "GRASP"

Assigning responsibilities

- Where does this method go?
- Who should own this data?
- Who should create this thing?

...

Who is in charge of moving the golf ball?
Who is in charge of telling us the ball's position?

Information Expert

Who should have this responsibility?
- Who has the data necessary to do it?

Synonyms and variations:

- Tell, don't ask
- Data envy
- Object orientation - put data with behavior
- Command, query separation
