

# Operational Evolution

As envisioned by DevRel

01	Continuous Integration	<ul style="list-style-type: none"><li>• Share changes frequently</li><li>• Automate development workflows</li></ul>
02	Continuous Delivery	<ul style="list-style-type: none"><li>• Release changes regularly</li><li>• Automate releases</li><li>• Automate deployments</li></ul>
03	DevSecOps	<ul style="list-style-type: none"><li>• Bring teams together</li><li>• Automate environments</li><li>• Integrate security end-to-end</li></ul>
04	GitOps	<ul style="list-style-type: none"><li>• Everything-as-code (declarative)</li><li>• Continuously reconcile changes</li><li>• Reverse the stream (pull-based releases)</li></ul>

# Continuous Integration

What does “continuous” mean?
