

Definition of Ready (DoR)

- ✓ No open questions
- ✓ PO confirms ready
- ✓ Dev teams confirm ready
- ✓ 1/4 sprint or smaller
- ✓ Acceptance criteria defined
- ✓ Test strategy complete
- ✓ No unresolved dependencies
- ✓ Domain models updated (if applicable)
- ✓ Mockups done (if applicable)
- ✓ Spec by Example done (if applicable)
- ✓ Design workshop done (if arch significant)

EXAMPLE DOR

Building a Definition of Ready

Activity

GOAL

Craft a definition of ready for the work items your team will complete this week. What are the things that must be true before we are willing to put hand on keyboard.

CONSTRAINTS

- 10 minutes
- The whole team must participate and agree
- Don't forget non-functionals
- Limit scope to this weeks work, not some ideal state

DELIVERABLES

A working definition of ready for the work items your team will complete this week.

INSTRUCTIONS

As a team, craft a definition of ready for the work you will complete this week. This will be added to you code repos in the near future. If it can be automated it shouldn't be part of DoR
