

# Expectations

1. Plan - What's the list of stuff you need to get done? What will you do first?
  - a. Ready - Did you meet your DoR? What's left?
  - b. Done - What things need completed to reach DoD?
  - c. Is your working agreement visible?
2. Bootstrap - A safety net to get started
  - a. Do you have an automated build working?
  - b. Do you know how to check GitHub actions to confirm?
3. ATDD
  - a. Build failing tests
  - b. Don't forget living documentation
4. UTDD
  - a. Build failing tests
  - b. Make them pass
  - c. Refactor

! All models are wrong...so what do you do when they are?
