# Eventually...distill into tests

# Eventually...distill into tests

#### Name

The name of the scenario we're exploring

#### **Preconditions**

Things that are true prior to this event / system operation

## Feature: Checkout

In order to keep an inventory of our media As a librarian

I \*want\* to be told the \*\*due date\*\*
 and \*\*status\*\* of media after \*checkout\*

## Scenario: Children's books

And the name of the media is Cat in the Hat And the availability is Avail And the type is Kids Book When the book is checked out

Then the availability should be Checked Out And the due date should be 6/5/14

And the message should be Success

### Operation

Description of what the system operation

### **Post Conditions**

Things that are true after the event / system operation
