

Let's try it together, as we model the concept of a "game map"

Follow along with me: https://mermaid.live

Note:

I will be making things up on the fly to demonstrate the technique, but you should create this alongside your comms diagram.

Design Class Diagrams

Look at your Communication
Diagram, create a Design Class
Diagram of all the classes (with
methods and attributes) needed for
this iteration. Shared understanding
is more important than notation

You can draw it, or use Mermaid.

<u> https://mermaid.live</u>

If you find yourselves making design decisions, go back to your communications diagram.
