Let's CODE!

Expectations

1. Plan - What's the list of stuff you need to get done? What will you do first?
   a. Ready - Did you meet your DoR? What's left?
   b. Done - What things need completed to reach DoD?
   c. Is your working agreement visible?
2. Bootstrap - A safety net to get started
   a. Do you have an automated build working?
   b. Do you know how to check GitHub actions to confirm?
3. ATDD
   a. Build failing tests
   b. Don't forget living documentation
4. UTDD
   a. Build failing tests
   b. Make them pass
   c. Refactor

! All models are wrong…so what do you do when they are?
